

XUAN CHEN

M.Math
Quantitative Research Intern

xuan.chen@bodhiresearchgroup.com

Xuan Chen is enrolled in the Master of Science in Financial Mathematics at the University of Chicago. Xuan graduated from McGill University with a Bachelor's degree in Finance and French where she developed a solid accounting foundation and strong finance background. Currently, she is expanding her expertise in using statistical and mathematical methods to conduct more advanced analyses.

In addition to her relevant education, she has also interned at several security firms in China. One such experience was at CITIC Securities, where she conducted in-depth analyses about the company profile and the lithium battery separator industry from the perspective of its techniques, evolutionary history in China, product chain, market competition, and future trends. Through these internships, she sharpened her analytical skills both qualitatively and quantitatively.

During her spare time, she actively participated in finance-related competitions and voluntary programs. In the Ubiquant simulated trading competition, her team was ranked 3rd among 200 teams. She also volunteered as a mentor for Pennydrops McGill to teach high school students finance knowledge.
