

DANYAN ZHANG

Quantitative Research Intern

danyan.zhang@bodhiresearchgroup.com

Danyan Zhang is currently enrolled in the Master of Financial Mathematics program in the University of Chicago. She completed her undergraduate degree from the University of Virginia, double majored in Mathematics and Economics.

From experience, Danyan has had multiple internships within the field of finance. During this time, she was directly involved in data analysis and financial modeling. Last summer, she interned in the risk management department at a Leasing company, where she did data cleaning, improving, and disaggregating jobs. Through this experience, she strengthened her data analysis skills which she aims to utilize at Bodhi Research Group. During Danyan's internship as a quantitative research assistant in an Asset Management company, she designed and developed a systematic quantitative trading strategy for commodity futures listed in the Shanghai Futures Exchange. From this, Danyan gained professional experience in analyzing large volumes of financial data.

Additional to industry experience, Danyan is passionate about financial markets. Her undergraduate studies included the Theory of Financial Markets, Mathematics of Derivative Securities, and Econometrics. Her interest in financial markets brought her to the program at the University of Chicago taking courses in Portfolio Theory & Risk Management and Option Pricing.

In Danyan's spare time, she likes to play frisbee and watch FRIENDS. Danyan also enjoys concerts and films.
