

YOUNGHUN LEE

Quantitative Research Intern

younghun.lee@bodhiresearchgroup.com

Younghun Lee is currently enrolled in the Master of Science in Financial Mathematics at the University of Chicago. Younghun graduated from Seoul National University with a Bachelor's degree in Economics and Financial Economics.

During his bachelor's, Younghun was involved in several research projects, focusing on machine learning applications for empirical asset pricing and economic prediction problems. Outside of the university, Younghun had the privilege of working for his fintech startup team, Quantry, as a quantitative finance researcher. He built the Neural Net models to predict the weekly returns of the NASDAQ stocks and maintained the database of language data crawled from various investment-related online communities. Younghun's team also had a chance to be a finalist in the NIPA AI Competition, predicting solar spot with Vision Transformer. He interned at the Computer Science department of Seoul National University as an undergraduate researcher. Younghun's research topic was centered on Interpretable AI, especially extending LIME to time series settings.

In his spare time, Younghun enjoys watching Formula 1 or playing tennis. Younghun is also a big fan of rock music and likes to play electric guitar.
