## HAO ZHENG

M.Math  
Quantitative Research Intern

[hao.zheng@bodhiresearchgroup.com](mailto:hao.zheng@bodhiresearchgroup.com)

Hao Zheng is enrolled in the Master of Science in Financial Mathematics at the University of Chicago. She graduated from the University of California, Los Angeles with a Bachelor's Degree in Applied Mathematics with a specialization in Computing.

Having majored in Financial and Applied Mathematics, her studies include Quantitative Strategy, Option Pricing, Differential Equation, Optimization, and Stochastic Process. She also participated in a Behavioral Economics Research that focused on Reference Dependence Preference, where she used Stata to analyze the basic data and to create the final report.

Prior to joining the master's program, Hao interned as a Data Engineer at Ant Group, responsible for building a model to generate the logistic insurance premium for the wholesale platform named 1688.com. During the internship, she was equipped with the skills to perform data cleaning, feature engineering, and model building using both SQL and Python. In addition to her quantitative skills, Hao regards communication and collaboration as essential. During her internship at Deloitte, she was responsible for communicating directly with the clients to understand their needs and address their questions.

Aside from the technical skill-set, Hao loves rock music. She is planning to form her own band and play lead guitar.
