## YUYAN XUE

M.Math  
Quantitative Research Intern

[yuyan.xue@bodhiresearchgroup.com](mailto:yuyan.xue@bodhiresearchgroup.com)

Yuyan Xue is currently enrolled in the Master of Financial Mathematics program in the University of Chicago. Graduating from Peking University with Bachelor's degree in Data Science and Economics, Yuyan is enthusiastic in quantitative finance.

During Yuyan's undergraduate studies in Peking University she's greatly developed in mathematics and computer science fields, taking various courses. For the mathematical field, in addition to basic courses like Calculus and Linear Algebra, she enrolled in courses like Probability, Statistics, ODE, and some discrete mathematics courses. To gain sufficiency in computer programming, she enrolled in several courses including Data Structure, Python, Database, and more, all of which had one or more capstone projects to exercise her skills. As well, Yuyan had the chance to broaden her horizons in emerging fields like Deep Learning. Moreover, several courses in her Economics major enhanced her awareness of the financial world. Past practical experiences in internships has provided insight in quantitative finance related work where she explored various types of assets, model construction identifying patterns of stocks, funds, commodities, options and futures.
